

# Gianna

#20181044

International Bot  
Height 10.5"  
Weight 9.2oz

Gianna is an international bot and is the first European bot of the group. Gianna's parts came from a small electrical shop in Naples, Italy. The body is an old light switch and the head is an electrical adapter.

Gianna has been traveling around the United States since 2015 enjoying all the sights and sounds of this foreign land.

# Cloris

#2015300

Typewriter Bot  
Height 1.0"  
Weight 1.0oz

Cloris is the workaholic type A bot that enjoys staying in the workshop to make sure everything is working and is in its place. Cloris is always looking for new ways to create bots.

With a typewriter return key body and a video game guitar controller head, Cloris loves to listen to music while working in the shop.

# Clancy

#2017981

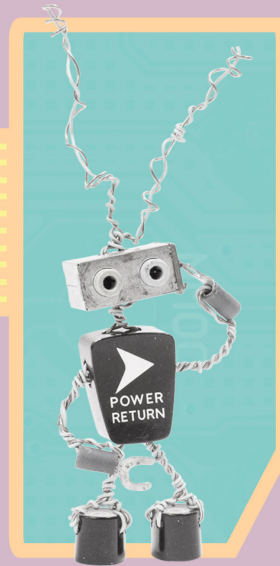

Letterpress Bot  
Height 6.5"  
Weight 1.6oz

This redhead gets its fiery attitude from its heat sink head. Clancy is the troublemaker of the group who is always looking for new risky adventures!

Clancy's body was found in the largest antique mall in Ohio and is also the oldest piece of technology in the entire group.

# Berta

#2015208

Typewriter Bot  
Height 6"  
Weight 0.8oz

Berta is the oldest of the bot group & has had a creative hand in putting each of the group members together since 2015. Berta felt the bots' creator needed assistants to help with bot production and finding new parts.

Berta brings together both old and new world parts with a head of a computer speaker port & body & feet from a vintage typewriter.
